

Index

- anisotropic media, 53
- back scattered data, 6
- Born approximation, 4
- boundary condition
 - impedance, 20
 - perfectly conducting, 20
- buried objects, 107
- electric dipole, 22
- electromagnetic Herglotz pair, 26
- electromagnetic plane wave, 24
- examples in three dimensions
 - buried objects, 126
 - impenetrable obstacles, 46
 - screens, 105
- factorization method, 45
- Falkland Island penguins, 1
- far field equation
 - electromagnetic, 39
 - scalar, 7
- far field operator
 - electromagnetic, 38
- far field pattern
 - electric, 24
 - magnetic, 24
 - scalar, 3
- frequency, 2
- Helmholtz equation, 2, 22
- Herglotz kernel, 26
- Herglotz operator, 33
- Kirchoff approximation, 6
- limited aperture data, 45
- linear sampling method (LSM)
 - obstacle problem, 38
 - penetrable medium, 76, 79, 90
 - scalar, 7
 - screens, 103
 - implementation, 104
- magnetic dipole, 22
- Maxwell eigenvalue, 39, 111
- Maxwell's equations, 19
- mini-marshmallow, 3
- mixed boundary value problem, 29
- monochromatic wave, 2
- Morozov principle, 10
- near field
 - data, 110
 - equation, 110
 - operator, 110
- radiation condition
 - Silver–Müller, 20
 - Sommerfeld, 3, 22
- reciprocity gap
 - functional, 113
 - operator, 113
- reciprocity gap functional method, 112
 - for anisotropic media, 120
 - for perfect conductors, 116
- reciprocity relation, 25
 - mixed, 30
- refractive index, 21
- Rellich's lemma, 23
- sampling operator, 114
- screens, 93
 - mixed, 94
 - perfectly conducting, 93
- spectral cutoff, 13

- spherical function
 - Bessel, 25
 - Hankel, 25
- spherical vector wave functions, 26
- Stratton–Chu formula
 - first, 21
 - second, 22
- surface conductivity, 89
- surface differential operator
 - curl, 33
 - divergence, 32
- surface impedance, 29

- temporal frequency, 2
- Tikhonov regularization, 10
- transmission eigenvalues, 70, 83, 111
- transmission problem
 - interior, 55, 69
 - interior, buried object, 111
 - Maxwell, 54
 - modified interior, 55

- uniqueness theorem
 - partially coated obstacle, 30
 - refractive index, 68
 - screen, 96
 - support of a penetrable obstacle, 59

- vector addition theorem, 26
- vector spherical harmonics, 25

- wave number, 2
- wavelength, 2
