Index

$\omega$-limit set, 11, 13
activator-inhibitor system, 22, 28, 34, 47
Allen–Cahn equation, 19
asymptotically stable, 15
autonomous equations, 16
boundary condition
  Dirichlet, 1
  Neumann, 1, 2
  third, 1, 7
CDIMA reaction, 51
chemotaxis system, 84, 94
CIMA reaction, 50
competition
  strong, 91
  weak, 73, 74, 77
cross-diffusion, 83, 91
cross-diffusion system, 91
De Giorgi conjecture, 59
directed movement(s), 83, 84
Dirichlet boundary condition, 1
Domain-Monotonicity Property, 2, 3
eigenvalue(s), 4, 26
  first, 59, 68
  Laplace operator, 2
  principal, 67
elliptic shadow system, 48
energy functional, 11, 28, 36
environment
  heterogeneous, 65, 74
  homogeneous, 72
equation
  Allen–Cahn, 19
  autonomous, 16
  heat, 1
logistic, 66
nonautonomous, 19
reaction-diffusion, 11
finite time blow-up, 23
first eigenvalue, 59, 68
general $2 \times 2$ reaction-diffusion system, 25
general autonomous shadow systems, 26
general (not necessarily autonomous) shadow system, 25
Gierer–Meinhardt system, 28, 47
global existence, 23
Gray–Scott model, 51
heat equation, 1
heterogeneous environment(s), 65, 74
homogeneous environments, 72
hydra, 22
ideal free distribution, 89
instability, 14
intrinsic diameter, 3
intrinsic distance, 3
Laplace operator
eigenvalues of, 2
least-energy solution, 28, 32, 33
Lengyel and Epstein model, 51
linearized stability, 14, 15
Lipschitz domain(s), 7, 8
logistic equation, 66
Lotka–Volterra competition-diffusion system, 65
moving plane method, 53, 55, 62
multipeak spike-layer solutions, 40
multipeak spike-layer steady states, 48
negative taxis, 83
Neumann boundary condition, 1, 2
nonautonomous equations, 19
nonautonomous shadow systems, 27

positive taxis, 83
principal eigenvalue, 67

reaction
CDIMA, 51
CIMA, 50
reaction-diffusion equations, 11

self-diffusions, 90
shadow system(s), 21, 23, 24, 34, 35, 51, 93

single boundary spike-layer steady states, 30
single-peak spike-layer solutions, 36
solution
least-energy, 28, 32, 33
multipeak spike-layer, 40
single-peak spike-layer, 36
spike, 29
spike-layer steady states, 95
stability, 14–16, 19, 24, 29
asymptotic, 15
linearized, 14, 15
stabilization, 9, 14
stable, 15
steady states
multipeak spike-layer, 48
single boundary spike-layer, 30
strong competition, 91
symmetry, 52
system
activator-inhibitor, 22, 28, 34, 47
chemotaxis, 84, 94
cross-diffusion, 91
elliptic shadow, 48
general $2 \times 2$ reaction-diffusion, 25
general autonomous shadow, 26
general shadow, 25
Gierer–Meinhardt, 28, 47
Gray–Scott, 51
Lengyel–Epstein, 51
Lotka–Volterra competition-diffusion, 65
nonautonomous shadow, 27
shadow, 21, 23, 24, 34, 35, 51, 93
taxis, 83
negative, 83
positive, 83
third boundary condition, 1, 7
transition layers, 19
weak competition, 73, 74, 77
