Contents

Preface ix

1 Introduction 1

2 Lagrangian and Eulerian descriptions of hydrodynamic systems 5
  2.1 Incompressible Euler equations 11

3 Hydrodynamic models 23
  3.1 The Lagrangian-Eulerian structure 23
  3.2 SQG 26
  3.3 Porous medium 27
  3.4 Boussinesq 28
  3.5 Oldroyd-B 31

4 Spaces and operators 33
  4.1 Spaces 33
  4.2 Operators 34

5 The Lagrangian-Eulerian existence theorems 43
  5.1 Local existence 43
  5.2 Small data global existence with damping 47

6 Critical dissipative active scalars 51
  6.1 Lower bounds on the fractional Laplacian 51
  6.2 Hölder regularity 54
  6.3 Higher regularity 56

Bibliography 59
