Preface	ix
1 Introduction	1
2 Quantum mechanics and the Schrödinger equation	7
2.1 The Schrödinger equation . . . . .	9
2.2 Stationary quantum states . . . . .	13
2.3 A charged particle in an electromagnetic field . . . . .	16
2.4 The quantum spin . . . . .	17
2.5 The Pauli equation . . . . .	19
2.6 The Liouville–von Neumann master equation . . . . .	27
2.7 The multiparticle Schrödinger equation . . . . .	37
2.8 The Gross–Pitaevskii equation . . . . .	39
2.9 The time-dependent density functional theory . . . . .	42
2.10 The Wigner function and the quantum Liouville equation . . . . .	57
2.11 The Belavkin equation . . . . .	63
2.12 Real matrix representation of quantum models . . . . .	66
3 Optimal control theory for quantum systems	73
3.1 Well-posedness of quantum optimal control problems . . . . .	75
3.2 Optimal control of finite-dimensional quantum systems . . . . .	100
3.3 Optimal control of the Kohn–Sham model . . . . .	128
3.4 Optimal control of other infinite-dimensional quantum systems	154
3.5 Quantum feedback control . . . . .	159
4 Controllability of quantum systems	163
4.1 Finite-dimensional systems . . . . .	164
4.2 Conical eigenvalue intersections . . . . .	169
4.3 Quantum spin systems . . . . .	170
4.4 Infinite-dimensional systems . . . . .	175
5 Discretization schemes	181
5.1 Time-integration schemes . . . . .	182
5.2 Pseudospectral methods . . . . .	185
5.3 Operator splitting methods . . . . .	197
5.4 The modified Crank–Nicolson scheme . . . . .	206

---

<b>6</b>	<b>Numerical optimization methods</b>	<b>221</b>
6.1	Classical optimization schemes . . . . .	221
6.2	Monotonic schemes . . . . .	232
6.3	Newton methods . . . . .	242
6.4	Multigrid optimization . . . . .	275
6.5	Line-search methods . . . . .	283
6.6	Methods for solving quantum exact-controllability problems . . .	291
<b>7</b>	<b>Application to quantum control problems</b>	<b>311</b>
7.1	A three-level model in quantum optics . . . . .	311
7.2	Spin systems in a magnetic field . . . . .	316
7.3	Control of a charged particle in a well potential . . . . .	331
7.4	Multigrid optimization schemes for Bose–Einstein condensate control problems . . . . .	336
7.5	Time-dependent density functional control problems . . . . .	341
	<b>Appendix</b>	<b>345</b>
A.1	Exact solutions to central force problems . . . . .	345
A.2	Spectral discretization of the Pauli equation . . . . .	350
A.3	Lie algebra and Lie groups . . . . .	355
A.4	Results of functional analysis . . . . .	357
A.5	Nonsmooth calculus . . . . .	361
	<b>Bibliography</b>	<b>363</b>
	<b>Index</b>	<b>389</b>
