Index

actuator delay, 111
adaptive control, 145
Agmon’s inequality, 20

backstepping, 9, 30, 47
backstepping transformation, 30, 54, 58,
  65, 70, 83, 112, 125, 148, 154
Barbalat’s lemma, 149
beam models
  Euler–Bernoulli, 89, 138
  Rayleigh, 90
  shear, 90
  Timoshenko, 90
Bessel functions, 173
boundary conditions, 16
boundary control, 29
boundary damper, 80, 90
boundedness, 19, 149
Boussinesq equation, 118

Cauchy–Schwarz inequality, 17
certainty equivalence, 56, 145
closed-form solution, 35, 37, 41, 43, 47,
  55, 59, 66, 86, 110, 113
collocated sensor/actuator, 57, 81
compensator transfer function, 60, 74
damping
  boundary, 80, 90
  Kelvin–Voigt, 80, 85, 137
  viscous, 80
delay equation, 109
Dirichlet boundary condition, 16
eigenfunctions, 25
eigenvalues, 25, 82, 85, 97
equation
delay, 109
  Ginzburg–Landau, 68
  partial integro-differential, 46, 92,
    93, 109
  reaction-advection-diffusion, 42, 44
  reaction-diffusion, 30, 38, 133
  Schrödinger, 65
  wave, 79, 91, 136
estimation error, 152
Euler–Bernoulli beam, 89, 95, 138
feedback linearization, 163
Fourier transform, 121
gain kernel PDE (partial differential equation), 32, 40, 43, 44, 46,
  55, 59, 66, 70, 92, 110, 113,
  117, 125, 166
gauge transformation, 44
Ginzburg–Landau equation, 68
$H_1$ stability, 21
heat equation, 16
hyperbolic PDEs, 79, 109, 138
inequality
  Agmon, 20
  Cauchy–Schwarz, 17
  Poincaré, 17
  Young’s, 17
inverse transformation, 36, 56
Kelvin functions, 66
Kelvin–Voigt damping, 80, 85, 137
Korteweg–de Vries equation, 115
Kuramoto–Sivashinsky equation, 115

$L_2$ stability, 18
Laplace transform, 60, 91, 110
Lyapunov function, 16, 48, 56, 71, 81, 83, 147, 152, 154
Lyapunov stability, 16

motion planning, 131

Neumann boundary condition, 16, 41
nonlinear control, 161
norms, 14

observer, 53, 57, 73
Orr–Sommerfeld equation, 122
output feedback, 56, 73, 85, 151

parabolic PDEs, 29, 79
partial differential equations (PDEs)
  first-order hyperbolic, 105, 135
  hyperbolic, 79
  parabolic, 29, 79
partial integrodifferential equation, 46, 92, 93, 109
passive absorber, 80
passive identifiers, 145, 147
Poincaré’s inequality, 17
Poiseuille flow, 119
prediction error, 152

Rayleigh beam, 90
reaction-advection-diffusion equation, 42, 44
reaction-diffusion equation, 30, 38, 133
regulation, 150, 156
Robin boundary condition, 16, 44, 83
Schrödinger equation, 65
separation of variables, 23
shear beam, 90
Smith predictor, 113
Squire equation, 122
string equation, 83
successive approximations, method of, 34
swapping identifiers, 145, 152
target system, 30, 38, 44, 70, 83, 85, 97, 109, 117, 125, 148, 154
Timoshenko beam, 90
trajectory generation, 132
trajectory tracking, 139
transformation
  backstepping/Volterra, 30
gauge, 44
  inverse, 36
update law, 147, 152
viscous damping, 80
Volterra series, 165, 167
vortex shedding, 68

wave equation, 79, 91
eigenvalues, 82, 85
Lyapunov, 81, 83
motion planning, 136
output-feedback, 85
undamped, 80
  with Kelvin–Voigt damping, 85, 137
wavenumbers, 121
Young’s inequality, 17
