Index

area function, 486

Auchmuty
  dual principle, 241, 242, 539

Bernoulli condition, 259

Bouligand contingent cone, 194

boundary
  function, 484
  integral, 70, 94
  measure, 96
  measure theoretic, 220

bounded curvature, 299

Caccioppoli set, 252

canonical density, 71, 95

capacitary constraints, 429

capacity
  \((r,c)\)-density condition, 441, 443, 450, 451
  strong\((r,c)\)-density condition, 441
  thick, 441
  Wiener criterion, 441

Carathéodory set, 434

Cartesian graph, 176

chain rule, 465

characteristic function, 209
  strong convergence, 214
  weak convergence, 217

Clarke tangent cone, 200

coupled formula, 251

column
  buckling, 4, 240
  compactivorous property, 276
  compliance, 11, 228
  composite material, 215

cone property
  local uniform, 115
  uniform, 115

connected
  components, 59
  connected space, 58

continuity
  Hölder, 65
  Lipschitz, 65

convergence in measure, 248

convex function
  semiderivative, 467

covariant
  derivatives, 498
  partial derivatives, 499

cracks, 280
  \(b\)-cracks, 344

critical point, 317

curvature
  additive, 500
  bounded, 299, 354
  Gauss, 74
  locally bounded, 299
  mean, 74, 500
  principal, 74

cusp property, 115
  uniform, 115

density
  Wiener, 441

derivative, 458

  Fréchet, 462
  Gateaux, 460
  Hadamard, 461
    strong, 462
    weak, 462
diffeomorphism, 153
  $C^{k,\ell}$, 69
differentiable
  Fréchet, 478
  Gateaux, 477
dilated set
  closed, 280
  $h$-boundary, 280
  open, 280
Dirichlet boundary value problem
  classical, 420
  overrelaxed, 420
  relaxed, 420
distance
  geodesic, 58
distance function, 268
  oriented, 337
  $W^{1,p}$-topology, 292, 296, 350
  $\chi_\Omega$, 295
  $\chi_A$, 294, 297
domain
  $C^k$, 68
  $C^\infty$, 173
  connected, 58
  equi-Hölderian, 88
  equi-Lipschitzian, 88
  Hölderian, 87
  $(k,\ell)$-Hölderian, $C^{k,\ell}$, 68
  integral, 504
  $k$-Lipschitzian, $C^{k,1}$, 68
  Lipschitzian, 87
  locally
    $C^{k,\ell}$, 87, 88
    Hölderian, 87, 113
    Lipschitzian, 87, 113
  path-connected, 58
  Sobolev, 374
  $W^{k,p}(D)$, 252
  $W^{m,p}$, 374
dominating function, 81, 108, 113
  space, 81, 109
eigenvalue
  first, 535
  $\lambda^A(\Omega)$, 413
  problem, 5, 240
  embedding
    $H^k_0(\Omega)$ into $H^k_0(D)$, 62
  embedding theorem
    convex domains, 65
    path-connected domains, 66
  Euler’s buckling load, 5, 240
exterior
    measure theoretic, 220
finite perimeter
  locally, 247
  set, 247
  flat cone property, 450
free boundary, 259, 260
  problem, 263, 521
function
  bounded variation, 245
  concave, 281
  continuous
    $(0,\lambda)$-Hölder, 65
    $(k,\lambda)$-Hölder, 65
    Lipschitz, 65
    uniformly, 64
  convex, 281
  locally
    concave, 281
    convex, 281
  semiconcave, 281
  semiconvex, 281
  semiconcave, 281
  semiconvex, 281
  support, 322
  uniformly Lipschitzian, 465
function space
  embedding, 565
  parametrization, 522, 553, 565
fundamental form
  first
    $a_{\alpha}$, 74
  second, 500
    $b_{\alpha\beta}$, 74, 500
    $D^2b$, 492, 500
  third, 492
    $c_{\alpha\beta}$, 74
geodesic distance, 58
Lipschitz domains, 67
geodesics, 166
graph
locally
$C^{k,\ell}$, 89
Lipschitzian, 92
group structure on $\mathcal{P}(D)$, 57, 58
Hausdorff measure, 72, 73
$H^1(\Omega)$-norm function, 487
holdall, 170, 472
hole-free
set, 59
homeomorphism, 153
homogenization, 215, 219
inner product, 56
double, 56
interior
measure theoretic, 220
Laplace–Beltrami operator, 496
level sets, 178, 251
$C^{k,\ell}$, 75
Lie bracket, 502
linear elasticity, 546
linear extension
operator, 93
Lipschitz manifold, 317
metric
Courant, 123, 202, 205
Hausdorff, 270
complementary, 276
pseudometric, 130
right-invariant, 126
semimetric, 129
microstructure, 215
minimal surface problem, 12, 244
neighborhood
$h$-tubular, 280
normal derivative, 488
nowhere dense, 286
objective functional
Mumford–Shah, 32
orthogonal projection operator, 492
perimeter, 254
perturbation of the identity, 148, 151, 183
polar coordinates, 177
Preface, xix
projection, 492
on $A$, 284
on $\partial A$, 344, 347
onto a set, 279
pseudometric, 130
Rayleigh
quotient, 5, 240, 241, 537
reduced boundary, 250
regularization
Tikhonov, 32
relaxed problem, 230
representative
measure theoretic, 220
nice, 210, 220
open and closed, 221
saddle point
structure, 232
semiderivative, 458
Eulerian, 473
second-order, 506
Gateaux, 459, 477
Hadamard, 459, 469, 474
perturbation
identity, 172
velocity
method, 172, 473
semimetric, 129
set
boundary, 56
Caccioppoli, 244
$C^k$, 68
closure, 56
complement, 56
convex, 223
diameter, 72
equi-Hölderian, 88
equi-Lipschitzian, 88
finite perimeter, 244
hole-free, 59
interior, 56
$k$-Lipschitzian, $C^{k,1}$, 68
$(k, \ell)$-Hölderian, $C^{k,\ell}$, 68
level, 75
Lipschitzian, 87
locally
$C^{k,\ell}$, 87–89
convex, 381
Hölderian, 87, 113
Lipschitzian, 87, 113
semiconvex, 381
strictly convex, 381
semiconvex, 381
stable, 420
shape
differentiable, 479
twice, 510
function, 170
continuity, 202
functional, 170, 202, 472
definition, 472
gradient, 479
semiderivative, 172
variational principle, 521
skeleton, 344
stable set, 420
staircase, 292
structure theorem, 479
submanifold, 71
surface
measure, 94, 96
tangent space, 148, 151
tangent space to $\mathcal{F}(\Theta)$, 148, 151
tangential
calculus, 491
divergence, 495
gradient, 493
Hessian matrix, 496
Jacobian matrix, 495
linear strain tensor, 495
vectorial divergence, 496
topology
Hausdorff, 270
complementary, 276, 277
uniform metric, 340
transform
Fenchel, 322
transformations, 180, 193
transmission problem, 11, 228, 235, 423
transpose, 56
transpose of a matrix, 6
tubular norms, 355
uniform cone property, 254
universe, 170, 472
velocity method, 171, 180
viability condition, 195
volume
function, 473, 481
functional, 486
integral, 482, 485
Wiener
density, 441
Wiener criterion, 441
