Preface xiii

1 ORIGINS AND APPLICATIONS OF AIMD 1
- 1.1 Background and description . . . 1
- 1.2 Mathematical formulation . . . 2
- 1.3 Nonsynchronized and nonhomogeneous AIMD . . . 6
- 1.4 Research questions concerning AIMD and its variants . . . 8
- 1.5 Further reading . . . 9
- 1.6 Why write this book now? . . . 10
- 1.7 Outline of the book . . . 10

I LINEAR AIMD 13

2 SYNCHRONIZED HOMOGENEOUS AIMD 15
- 2.1 Convergence . . . 15
- 2.2 The spectrum of AIMD matrices . . . 21
- 2.3 Symmetric matrices, consensus, and a standard form . . . 24
- 2.4 Further reading . . . 27

3 NONSYNCHRONIZED NONHOMOGENEOUS AIMD 29
- 3.1 AIMD matrices are contractive (nonexpansive) . . . 32
- 3.2 Left products of AIMD matrices and the "memoryless" property . . . 35
- 3.3 Right products of AIMD matrices . . . 38
- 3.4 A glaring omission: Multiple constraints . . . 38
- 3.5 Further reading . . . 42

4 THE IID AIMD MODEL 45
- 4.1 The IID AIMD model . . . 46
- 4.2 Convergence of the mean . . . 47
- 4.3 Convergence of second-order moments . . . 52
- 4.4 Further reading . . . 58

5 MATHEMATICAL BACKGROUND FOR PART I **61**
5.1 Eigenvalues and eigenvectors 62
5.2 Positive, nonnegative, and stochastic matrices 64
5.3 Probability and expected values 65
5.4 Proof of AIMD contraction properties 66
5.5 Proofs of convergence properties of left AIMD products 67
5.6 Proofs of convergence properties of right AIMD products 69
5.7 Further reading 72

II STOCHASTIC LINEAR AIMD **73**

6 IID AIMD AND ERGODICITY **75**
6.1 A preamble on general versions of AIMD 75
6.2 The limit distribution 79
6.3 Invariant distribution 83
6.4 The ergodic property and Breiman's condition 85
6.5 Further reading 87

7 AIMD WITH STATE-DEPENDENT TRANSITION PROBABILITIES **89**
7.1 The state-dependent AIMD model 89
7.2 A contractive property of AIMD matrix sets 91
7.3 An attractive invariant distribution 92
7.4 The ergodic property 94
7.5 Implications of ergodicity for asymptotic behavior 94
7.6 Further reading 99

8 A MARKOV CHAIN MODEL FOR CAPACITY EVENTS **101**
8.1 The Markov chain AIMD model 101
8.2 The limit distribution 104
8.3 Invariant distribution 110
8.4 The ergodic property 110
8.5 The first moment of the invariant distribution 111
8.6 Further reading 114

9 MATHEMATICAL BACKGROUND FOR PART II **115**
9.1 Markov chains on finite state spaces 115
9.2 Markov chains on topological spaces 117
9.3 Proof of Theorem 7.4: Outline of main ideas 127
9.4 Proof of Theorem 7.4: Further details 132
9.5 Further reading 140

III NONLINEAR AIMD **141**

10 A PRIMER ON NONLINEAR AIMD **143**

11 SYNCHRONIZED HOMOGENEOUS NONLINEAR AIMD **147**
11.1 Introduction 147
11.2 A general nonlinear increase-decrease algorithm 148
11.3 Assumptions 151

11.4 Convergence . . . 152
11.5 AINLD . . . 155
11.6 Characterization of equilibria . . . 163
11.7 Uniqueness of equilibrium . . . 163
11.8 Development of main result . . . 164
11.9 Generalized algorithm . . . 168
11.10 Example . . . 171
11.11 Further reading . . . 174

12 NONSYNCHRONIZED NONHOMOGENEOUS NAIMD 175
12.1 Introduction . . . 175
12.2 AINLD . . . 176
12.3 Deterministic AINLD . . . 178
12.4 Stochastic AINLD . . . 182
12.5 Further reading . . . 187

13 NONSYNCHRONIZED ALGORITHMS WITH STOCHASTIC STATE-DEPENDENT GROWTH RATES 189
13.1 Introduction . . . 189
13.2 Nonsynchronized AINLD with stochastic growth rates . . . 190
13.3 Convergence and ergodicity . . . 194
13.4 Further reading (and an open question) . . . 194

IV APPLICATIONS OF AIMD ALGORITHMS 195

14 THREE SAMPLE APPLICATIONS OF AIMD 197
14.1 Application 1. Congestion control in the Internet . . . 197
14.2 Application 2. Charging electric vehicles . . . 199
14.3 Application 3. Virtual power plants . . . 200
14.4 Conclusions . . . 201

15 ANOTHER APPLICATION: NETWORK UTILITY OPTIMIZATION 203
15.1 Introduction . . . 203
15.2 Problem description . . . 203
15.3 Convergence analysis . . . 207
15.4 Example . . . 213
15.5 Further reading . . . 214

16 MATHEMATICAL BACKGROUND FOR PART IV 215
16.1 Convexity . . . 215
16.2 Optimization and the KKT conditions . . . 217

Bibliography 223
