Preface	ix
List of Figures	xiii
List of Tables	xix
1 Introduction	1
1.1 Modeling	1
1.2 What are Differential Equations?	2
1.3 One-Dimensional Dynamics	5
1.4 Examples	8
Population Dynamics	8
Mechanical Systems	10
Oscillating Circuits	12
Fluid Mixing	13
1.5 Two-Dimensional Dynamics	14
Nullclines	14
Phase curves	16
1.6 The Lorenz Model	20
1.7 Quadratic odes: the Simplest Chaotic Systems	22
1.8 Exercises	22
2 Linear Systems	29
2.1 Eigenvalues and Eigenvectors	29
Eigenvalues and Eigenvectors	30
Diagonalization	34
2.2 Two-Dimensional Linear Systems	35
2.3 Exponentials of Operators	40
2.4 Fundamental Solution Theorem	45
2.5 Complex Eigenvalues	48
2.6 Multiple Eigenvalues	50
Semisimple-Nilpotent Decomposition	51
The Exponential	53
Alternative methods	56

2.7	Linear Stability	57
2.8	Nonautonomous Linear Systems and Floquet Theory	62
2.9	Exercises	67
3	Existence and Uniqueness	73
3.1	Set and Topological Preliminaries	73
	Convergence	75
	Uniform Convergence	75
3.2	Function Space Preliminaries	76
	Metric Spaces	77
	Contraction Maps	80
	Lipschitz Functions	82
3.3	Existence and Uniqueness	84
3.4	Dependence upon Initial Conditions and Parameters	92
3.5	Maximal Interval of Existence	98
3.6	Exercises	101
4	Dynamical Systems	105
4.1	Dynamical Systems	105
4.2	Flows	107
4.3	Global Existence of Solutions	109
4.4	Linearization	112
4.5	Stability	115
4.6	Lyapunov Functions	123
4.7	Topological Conjugacy and Equivalence	129
4.8	Hartman-Grobman Theorem	138
4.9	Omega Limit Sets	144
4.10	Attractors and Basins	149
4.11	Stability of Periodic Orbits	152
4.12	Poincaré Maps	155
4.13	Exercises	159
5	Invariant Manifolds	165
5.1	Stable and Unstable Sets	165
5.2	Heteroclinic Orbits	167
5.3	Stable Manifolds	169
5.4	Local Stable Manifold Theorem	173
5.5	Global Stable Manifolds	182
5.6	Center Manifolds	186
5.7	Exercises	192
6	The Phase Plane	197
6.1	Nonhyperbolic Equilibria in the Plane	197
6.2	Two Zero Eigenvalues and Nonhyperbolic nodes	198
6.3	Imaginary Eigenvalues: Topological Centers	203
6.4	Symmetries and Reversors	212

6.5	Index Theory	213
	Higher Dimensions: the Degree	218
6.6	Poincaré-Bendixson Theorem	220
6.7	Lienard Systems	225
6.8	Behavior at Infinity: the Poincaré Sphere	229
6.9	Exercises	238
7	Chaotic Dynamics	243
7.1	Chaos	243
7.2	Lyapunov Exponents	248
	Definition	250
	Properties of Lyapunov Exponents	252
	Computing Exponents	256
7.3	Strange Attractors	260
	Hausdorff Dimension	260
	Strange, Nonchaotic Attractors	263
7.4	Exercises	265
8	Bifurcation Theory	269
8.1	Bifurcations of Equilibria	269
8.2	Preservation of Equilibria	273
8.3	Unfolding Vector Fields	275
	Unfolding Two-Dimensional Linear Flows	277
8.4	Saddle-Node Bifurcation in One Dimension	280
8.5	Normal Forms	284
	Homological Operator	284
	Matrix Representation	287
	Higher Order Normal Forms	290
8.6	Saddle-Node Bifurcation in \mathbb{R}^n	292
	Transversality	294
	Center Manifold Methods	296
8.7	Degenerate Saddle-Node Bifurcations	297
8.8	Andronov-Hopf Bifurcation	299
8.9	The Cusp Bifurcation	302
8.10	Takens-Bogdanov Bifurcation	307
8.11	Homoclinic Bifurcations	309
	Fragility of Heteroclinic Orbits	310
	Generic Homoclinic Bifurcations in \mathbb{R}^2	311
8.12	Melnikov's Method	314
8.13	Melnikov's Method for Nonautonomous Perturbations	316
8.14	Shilnikov Bifurcation	325
8.15	Exercises	327
9	Hamiltonian Dynamics	335
9.1	Conservative Dynamics	335
9.2	Volume-Preserving Flows	337

9.3	Hamiltonian Systems	338
9.4	Poisson Dynamics	342
9.5	The Action Principle	344
9.6	Poincaré Invariant	347
9.7	Lagrangian Systems	350
	Coordinate Independence of the Action	352
	Symmetries and Invariants	356
9.8	The Calculus of Variations	357
9.9	Equivalence of Hamiltonian and Lagrangian Mechanics	360
9.10	Linearized Hamiltonian Systems	362
	Eigenvalues of Hamiltonian Matrices	364
9.11	Krein Collisions	367
9.12	Integrability	370
9.13	Nearly Integrable Dynamics	371
	Invariant Tori	372
	KAM Theory	373
9.14	Onset of Chaos in Two Degrees-of-Freedom	375
9.15	Resonances: Single Wave Model	379
9.16	Resonances: Multiple Waves	383
9.17	Resonance Overlap and Chaos	385
9.18	Exercises	386
A	Mathematical Software	395
A.1	Vector Fields	395
A.2	Matrix Exponentials	396
A.3	Lyapunov Exponents	397
A.4	Bifurcation Diagrams	398
A.5	Poincaré Maps	399
	Bibliography	401
	Index	409
