

Index

- D_n , 41
 D_n equivariants, 179
 Z_n , 39
 Z_n equivariants, 180
 Z_n symmetric maps, 124
- affine linear map, 150
 arithmetic rule, 15, 19
 attractor, 21
 attractor symmetry, 31
 average behavior, 90
 average symmetries, 32
 axis, 5
 axis of symmetry, 40
- Barnsley, Michael, 141
 Bénard experiment, 77
 Bénard, Henri, 77
 bifurcation diagram, 95, 98
 bilateral symmetry, 26
 birth rate, 92
 Bombelli, Rafael, 115
 Brahmagupta, 111
 Brusselator, 33
- Cardano, Girolamo, 115
 cartesian coordinates, 116
 chaos, 10, 13, 56
 - total, 56
 chaotic trains, 101
 circle, 56
 coloring by number, 17
 complex conjugation, 118
 complex multiplication, 117
 complex numbers, 104, 115
- complex plane, 116
 complexity, 12
 composition, 37
 conjugate pictures, 127
 contraction, 154
 contraction rate, 151
 contractions, 151
 Coveyou, Robert, 145
 Crossley, John, 110
 Crowe, Donald, 46
 crystallographic, 47
 cubic equation, 115
 cyclic group, 39
 cylindrical pipe, 29
- dal Ferro, Scipione, 115
 decimal expansion, 112, 147
 Dellnitz, Michael, 33
 determinism, 10
 dihedral group D_n , 41, 119
 dihedral logistic mappings, 119
 dihedral symmetry, 104, 119
 doubling rule, 15, 19, 92, 106
 dual lattice, 188
 dynamics, 10
- effective growth rate, 93
 equally likely, 23
 ergodic theorem, 31, 157
 Escher, Maurits, 47
 Euclid, 111
 Euclidean plane, 37
 even functions, 177
- fair coin, 145
 Faraday experiment, 30
 Faraday waves, 30
 Faraday, Michael, 30
 Feigenbaum's number, 97
 Feigenbaum, Mitchell, 91, 97
 Feldberg, Rasmus, 101
 Feynman, Richard, 38
 fixed point, 21, 94, 154
 - attracting, 21
 - repelling, 21
 Fourier series, 188
 fractal, 142, 152
 fundamental cell, 184
- G -equivariant, 177
 G -invariant, 177
 G -orbit, 177
 Gauss, Karl Friedrich, 116
 Giant's Causeway, 74
 glide reflection symmetries, 37
 Gluckman, Bruce, 30
 Gollub, Jerry, 30
 gravity well, 11
 group, 36, 37
 growth rate, 92
- halving map, 93, 94
 halving rule, 21
 hexagonal array, 74
 hexagonal lattice, 135
 Hippasus of Metapontum, 112
 holohedry, 184

- identity symmetry, 38
- imaginary, 114
- imaginary part, 116
- information, 12
- initial behavior, 17
- initial position, 11
- inner product, 184
- instantaneous symmetries, 32
- Institute of Mathematics and Its Applications, 122
- integers, 111
- internal symmetry, 134
- invariant theory, 177
- inverse symmetry, 37
- irrational number, 112
- irrational numbers, 147
- Islamic art, 85
- iterated function system, 152
- iterated function systems, 161
- iteration, 16, 154

- Knudsen, Carsten, 101
- Kronecker, Leopold, 111

- Lambert, Johann Heinrich, 113
- laminar flow, 29
- Laplace, Pierre Simon, 11
- Leibniz, Gottfried Wilhelm, 115
- linear, 93
- logistic map, 91
- logistic mapping, 93
- long-term behavior, 17

- magnitude, 117
- Mandelbrot, Benoit, 141
- mathematical models, 90
- May, Robert, 91, 96
- motion, 3, 36

- natural number, 111
- negative number, 111
- Newton's laws, 90
- Newton, Isaac, 10, 90
- nonagon, 40
- nondeterministic model, 11
- nondeterministic process, 143
- nonpolynomial term, 122, 171
- nontrivial symmetry, 5
- number zero, 37

- odd function, 98
- odd logistic map, 98, 104
- odd polynomials, 178
- Oregonator, 33
- overlaid fractal, 153

- patterns on average, vii, 33, 101
- Peitgen, Heinz-Otto, 141
- Pentagon, 59
- pentagonal symmetry, 57
- perfect symmetry, 56
 - breaking, 57
- period parallelogram, 184
- period two, 95
- period-doubling bifurcation, 95
- period-doubling cascade, 95, 98
- periodicity, 17, 113
- phase, 117
- pigeonhole principle, 17
- pixel, 13, 19
- pixel rule, 15, 16, 18, 19
- planar lattice, 183
- planar mapping, 104
- planar symmetry, 3, 74
- planar symmetry group, 130
- plane waves, 188
