Index

absolute temperature, 70
adiabatic exponent, 76, 260
admissible boundary condition, 27
Alfvén characteristic speed, 155
Alfvén theorem, 147
Ampère theorem, 9
Ampère–Biot–Savart law, 8
anisotropic tensor, 243
Beltrami equations, 179
bound charge, 41
boundary value problem with equivalued surface, 53
Cartesian tensor, 237
Cauchy elastic, 194
Cauchy problem, 23, 78, 104–106, 208
Cauchy strain tensor, 180
Cauchy stress tensor, 188
centered rarefaction wave, 115
characteristic curve, 88
Ciarlet–Geymonat material, 202
Clausius inequality, 250
closed system, 249
compressible Ogden material, 202
compressive shock, 116
conduction current, 42
conservation and transformation law of (electromagnetic) momentum, 19
conservation and transformation law of electromagnetic energy, 18
conservation law of magnetic field, 147
constitutive equation, 97
constitutive relation, 175, 194
contact discontinuity, 111
continuity equation, 71, 136, 183
continuity equation of electric current, 7
contraction of tensor, 240
conversational law of electric charges, 7
Coulomb gauge, 36
Coulomb’s law, 2
current density, 7
cycle, 250
Darwin model, 58, 61
deflagration, 161
deflection gradient tensor, 178
detonation, 161
dielectric constant, 2, 41
differential form of Ohm’s law, 51
diffusion equation, 142
dipole, 36
Dirichlet boundary condition, 50
Dirichlet integral, 50
displacement current, 43
displacement gradient tensor, 180
displacement vector, 179
dyadic vector, 19, 240

elastic body, 175
elastic material, 194
elastic tensor, 213
electric conductivity, 51, 67
electric dipole moment, 36
electric displacement vector, 41
electric field, 2
electric field intensity, 1, 3
electric field line, 3
electric flux, 3, 4
electric flux density, 41
electric neutrality, 132
electric polarizability, 41
electromagnetic energy, 18
electromagnetic energy density, 21, 47
electromagnetic energy flux density vector, 21, 47
electromagnetic field, 1
electromagnetic induction, 11
electromagnetic momentum, 19
electromagnetic momentum density vector, 21, 47
electromagnetic momentum flux density tensor, 21, 47
electromagnetic wave, 15, 27
electrostatic field, 2, 48
electrostatic field potential, 6
energy density, 71
energy flux vector, 71
enthalpy, 256
entropy, 75, 79, 218, 251
entropy condition, 116
entropy flux, 218
entropy flux vector, 79, 84
entropy function, 84
entropy inequality, 116, 218
equation of state, 70
equations in Eulerian representation, 120
equations in Lagrangian representation, 120, 158, 171
equilibrium state, 249
equivalued surface boundary condition, 50, 52
Euler equation, 73, 98, 138
Eulerian coordinates, 120, 176
Eulerian representation, 177
expansive coefficient of viscosity, 97

“frozen” principle of magnetic field lines, 147
Faraday’s law of electromagnetic induction, 12
fast characteristic speed, 155
field with source, 5
finite elasticity theory, 176
first coefficient of viscosity, 97
first law of thermodynamics, 250
first-order quasi-linear hyperbolic system, 87, 157, 172
first-order quasi-linear symmetric hyperbolic system, 76, 78, 151, 168, 219, 221
first-order quasi-linear system of partial differential equations, 75

first-order symmetric hyperbolic system of partial differential equations, 23
first-order system of partial differential equations, 22
first-order tensor, 239
Fourier’s experimental law, 92
free electromagnetic wave, 28
frictional shear stress, 90
Friedrichs inequality, 226

Gauge invariance, 34
Gauge transform, 34
Gauss’s law, 4
generalized Hooke’s law, 204
generalized Newton’s law, 97
generalized shear modulus, 224
geometric nonlinearity, 175
Gibbs free energy, 258

harmonic equation, 56
heat conductivity, 92
heat flux density vector, 92
heat function, 257
Helmholtz free energy, 257
homogeneous material, 194
Hugoniot equation, 112
Hugoniot function, 112
hyperbolic system, 88, 215
hyperelastic, 197

ideal fluid, 69
ideal gas, 70, 259
ideal magnetofluid, 149
ideal magnetohydrodynamics system, 149
incompressible fluid, 105
infinitesimal strain tensor, 180
initial-boundary value problem, 23, 25, 105, 106, 208, 214

interface condition, 44
internal energy, 70, 250
irrotational field, 6
isentropic flow, 89
isolated system, 249
isotropic, 198
isotropic tensor, 244
