

Index

- Anderson mixing, 18, 33
- breakdown, 32
- Cauchy integral, 39
- Cesaro sums, 82, 97
- Chebyshev parameters, 12
- Chebyshev polynomials, 11, 43, 49
- cluster
 - general, 80
 - outlier function, 80, 84
 - proper, 77
- conjugate gradient method, 27, 48
 - alternative convergence estimates, 60
 - classic convergence estimates, 49
 - inexact, 57
 - preconditioned, 59
 - stagnation periods, 49
 - superlinear convergence, 53
- convergence factor, 4, 12
- decomposition
 - block ILU, 211
 - Cholesky, 6, 29
 - ILU, 182, 186
 - LU, 3
 - QR, 3, 26
 - SVD, 3, 41
- delay of convergence, 34
- domain decomposition method, 158
 - alternating Schwarz, 158
 - Neumann–Neumann preconditioner, 165, 172
 - nonoverlapping domain decomposition, 161
 - Poincare–Steklov operator, 163, 164
 - Schur complement, 164
- ellipticity condition, 36
- equation
 - anisotropic diffusion, 176, 185
 - convection-diffusion, 176, 190
 - diffusion, 100
 - Navier–Stokes, 205
 - of linear elasticity, 176, 201
 - of Love, 94
 - Oseen, 224
 - Poisson, 103, 124, 158
 - reaction-diffusion, 175, 179
 - Stokes, 206
 - Symm’s, 96
- error functional, 13, 20
- error vector, 4
- estimate
 - Kaniel–Page, 52
- fast Fourier transform, 71
- field of values, *see* numerical range
- finite element method, 101
 - $isoP_2 - P_1$ element, 208
 - Crouzeix–Raviart element, 138, 142, 208
 - inverse inequality, 130
 - locking phenomena, 202
 - nonconforming, 138
 - orthogonality property, 180
 - Scott–Vogelius element, 202, 204
 - stiffness matrix, 104, 106, 129
 - SUPG method, 193
 - Taylor–Hood element, 208
 - Wilson element, 139, 142
- fixed point problem, 15
- formal scalar product, 30
- generalized minimal residual method, *see* minimal residual method
- geometric convergence, 4
- GMRES, *see* minimal residual method
- Gram–Schmidt procedure, 26
- H^2 -regularity, 128, 135
- index of an algorithm, 22
- inequality
 - Friedrichs, 100
 - Hölder, 19
 - Harding, 171
 - Necas, 207
 - strengthened
 - Cauchy–Schwarz, 148
- inner-outer iterations, 220
- Jordan normal form, 4, 5
- K -condition number, 60, 74
- Krylov subspaces, xv, 21, 23
- Krylov vectors, xv
- LBB condition, 208, 210
- leading submatrix, 50
- lemma
 - Lax–Milgram, 101
 - Reusken’s, 133
- logarithmic potentials, 44
- loss of orthogonality, 35
- matrix
 - circulant, 69
 - Fourier image of, 74
 - cyclic downward shift, 69
 - diagonal dominant, 20
 - elliptic, 36
 - Fourier, 70
 - Hermitian, 2

- Hessenberg, 3
- isodiagonal, 67
- iteration, 5
- Jacobian, 16, 17
- M -matrix, 9
- normal, 43
- positive definite, 6
- sparse, 107, 184
- stiffness, *see* finite element method, stiffness matrix
- symmetric, 2
- Toeplitz, 67
 - algebra, 68
 - generating function, 75
 - generators, 67
 - multilevel, 69, 92
 - symbol, 75
- method
 - Anderson, *see* Anderson mixing
 - Arnoldi, 50
 - biconjugate gradient, 30
 - CG, *see* conjugate gradient method
 - consistent, 5
 - fixed point, 15
 - Galerkin, 106
 - Gauss–Seidel, 8, 148
 - GMRES, *see* minimal residual method
 - inexact Krylov subspace, 55
 - inexact Richardson, 55
 - inexact Uzawa, 217
 - Jacobi, 8, 108, 131, 147
 - Krylov subspace, 21
 - Lanczos, 50
 - linear iterative, 5
 - minimal residual, *see* minimal residual method
 - Newton, 17
 - PCG, *see* conjugate gradient method, preconditioned
 - quasi-minimal residual, 32
