

Index

- absolute tensor, 209
- acyclic, 153
- adjacency tensor, 2, 9, 121
- algebraic connectivity, 134, 137
- algebraic multiplicity, 21, 22
- all ones tensor, 168
- analytic connectivity, 134, 171
- anti-circulant tensor, 8, 18, 228
- arithmetic mean tensor, 261
- augmented nonnegative
 - Vandermonde decomposition, 222
- automatic control, 10

- B_0 -tensor, 201
- B -tensor, 40, 201
- basic decomposition, 177
- basic part, 177
- basic rank-one Hankel tensor, 219, 225
- best rank-one approximation, 6, 27, 40, 42
- BFGS method, 159
- bicyclic hypergraph, 155
- block design, 171
- blow-up, 128
- bottom function, 79
- Brualdi–BWSZ tensors, 189

- CANDECOMP/PARAFAC decomposition, 5
- canonical nonnegative tensor partition, 66
- Cauchy tensor, 8, 248
- Cayley transform, 160
- characteristic polynomial, 21
- Cheeger constant, 137
- Cheeger inequality, 137
- chromatic number, 129
- circulant index, 228
- circulant tensor, 18, 40, 236

- clique, 130
- clique number, 130
- co-degree, 171
- coclique, 131
- Collatz–Wielandt minimax theorem, 49
- Comon’s conjecture, 6
- comparison tensor, 200
- complement hypergraph, 131
- complete Hankel tensor, 218, 219
- complete hypergraph, 130, 168
- completely positive augmented Vandermonde decomposition, 253
- completely positive decomposition, 6
- completely positive tensor, 6, 40
- completely positive Vandermonde decomposition, 250
- connectedness, 152
- copositive tensor, 10, 40, 126, 237
- core vertex, 145
- cored hypergraph, 145
- covariance, 2
- CP rank, 6
- cumulant tensor, 2
- cycle, 153
- cycle-time vector, 80
- cyclic index, 86
- cyclomatic number, 155

- D-eigenvalues, 31
- degree tensor, 2, 122
- determinant, 22, 125
- diagonal entries, 7
- diagonal tensor, 2, 7
- diagonally dominated tensor, 7, 186

- diameter, 128, 137
- diffusion kurtosis imaging, 31
- diffusion kurtosis tensor, 31
- diffusion magnetic resonance imaging, 2
- diffusion tensor, 2, 31
- diffusion tensor imaging, 2
- directed hypergraph, 118, 162
- directed hyperstar, 165
- distance, 128
- dominant eigenvalue, 105
- double B_0 -tensor, 203
- double B -tensor, 203
- doubly nonnegative tensor, 268
- dual cone, 206

- E-characteristic polynomial, 30
- E-eigenvalue, 9, 26
- E-eigenvector, 26
- edge connectivity, 134
- edge-releasing, 154
- eigenpair, 15
- eigenvalue, 9, 16, 32
- eigenvalue inclusion theorem, 23
- elasticity tensor, 31
- entanglement, 10
- essentially nonnegative tensor, 18, 40, 105
- essentially positive tensor, 102
- even-order tensor, 11

- Fidalgo-Kovacec lemma, 207
- fixed point problem, 111
- fractional Hadamard power, 258
- Frobenius norm, 5

- GB_0 -tensor, 204
- GB -tensor, 204
- generalized anti-circulant tensor, 228

- generalized eigenvalues, 31, 33
 generalized Kronecker symbol, 7
 generalized Lehmer tensor, 256
 generalized loose cycle, 147
 generalized loose path, 147
 generalized positive definite tensor, 18
 generalized positive semidefinite tensor, 18
 generalized power hypergraphs, 150
 generalized symmetric Pascal tensor, 255
 generalized tight cycle, 147
 generalized tight path, 147
 generating vector, 8, 213, 248
 geometric mean tensor, 261
 Geršgorin set, 178
 Geršgorin-type proposition, 19
 girth, 156
 graph energy, 171

 H^+ -eigenvalue, 59, 126
 H^{++} -eigenvalue, 59, 126, 265
 H -eigenvalue, 9, 16, 174
 H -eigenvector, 16
 H -spectrum, 126
 H -tensor, 40, 200
 Hadamard product, 5, 176
 Hamburger moment problem, 212
 Hankel tensor, 8, 40, 213
 harmonic mean tensor, 260
 hierarchically dominated, 245
 higher order diffusion tensor, 2, 10
 higher order Markov chain, 101, 110
 higher-order derivatives, 1
 Hilbert metric, 78
 Hilbert semi-norm, 78
 Hilbert tensor, 8, 40
 Hilbert–Hankel problem, 233
 homogeneous polynomial, 1
 homogeneous, monotone functions, 77
 HOSVD, 6
 hyper-degree, 167
 hypergraph, 121
 hypermatrix, 1, 3
 hyperstar, 128

 identity tensor, 7, 18

 image authenticity verification, 31
 inclusion set, 178
 increasing, 54
 independence number, 130
 independence set, 131
 infinite divisibility, 258
 inheritance property, 214
 interlacing, 171
 invariance, 29
 invariant subset, 81
 irreducible tensor, 12, 45
 irregular, 30
 isoperimetric number, 137

 k -mode product, 4

 Laplacian tensor, 2, 10, 18, 122
 largest H -eigenvalue, 16, 40
 Lehmer tensor, 256
 limited memory BFGS method, 159
 limiting probability distribution, 111
 linear convergence, 102
 linear hypergraph, 121
 LL tensor, 187
 LLK tensor, 187
 log convexity, 108
 loose cycle, 146, 147
 loose path, 146, 147

 M -eigenvalues, 31
 M -tensor, 40, 125, 126, 192
 magnetic resonance imaging, 40
 maximizing graph, 151
 maximizing hypergraph, 151
 maximum tensor, 260
 MB_0 -tensor, 203
 MB -tensor, 203
 mean, 2
 minimum tensor, 260
 moment tensor, 2
 monotone tensor, 192
 Motzkin polynomial, 205
 moving edges, 152, 154
 multi-hypergraph, 166
 multi-stochastic tensor, 116

 N -eigenvalue, 16
 N -eigenvector, 16
 non-uniform hypergraph, 167
 nonbasic part, 177
 nonlinear hypergraph, 121
 nonnegative, 54
 nonnegative strong Hankel tensor, 253
 nonnegative tensor, 9, 10, 18, 40
 nonnegative tensor partition, 65
 nonnegative Vandermonde decomposition, 218, 219
 nontrivially nonnegative tensor, 62
 NQZ algorithm, 99

 odd order copositive tensor without H -eigenvalues, 17
 odd-bipartite hypergraph, 138
 off-diagonal entries, 7
 orbit, 83
 orthogonal transformation, 28, 29
 orthogonally similar, 28

 P_0 -tensor, 192
 P -tensor, 40, 192
 Pareto H -eigenvalue, 267
 Pareto Z -eigenvalue, 267
 partially all-one tensor, 201
 Pascal tensor, 255
 path, 152
 PD tensor, 174
 Perron vector, 45, 53, 59, 123
 Perron-Frobenius theorem, 18, 45
 plane stochastic tensor, 116
 PNS polynomial, 205
 positive definite, 9
 positive definite tensor, 21
 positive Perron vector, 59, 64
 positive semidefinite, 9
 positive semidefinite tensor, 21, 174
 power hypergraph, 145
 power mean tensor, 260
 primitive index, 88
 primitive tensor, 88
 primitivity, 101
 principal sub-tensor, 62
 PSD tensor, 174

 Q -tensor, 40
 quantum entanglement, 32
 quantum field theories, 10
 quasi-double B_0 -tensor, 203
 quasi-double B -tensor, 203

 random hypergraph, 168

- rank, 5
- rank-one tensor, 3
- real geometrical multiplicity, 54
- reducible tensor, 45, 123
- regular, 30
- regular hypergraph, 121
- regular uniform hypergraph, 19
- representative matrix, 56
- representative vector, 61
- resultant, 21
- root-mean-square mean tensor, 261
- row sum, 18, 60
