- acoustics, 151
 - vibro-acoustics, 107
- Airy functions, 107, 112, 127, 129, 132, 154, 169
- Airy integral, 23, 154
- asymptotic analysis, 6, 150
 - hills, 85
 - method of stationary phase, 9
 - multivariate analysis, 13
 - pre-asymptotic regime, 150
 - uniform expansions, 126, 127, 151
 - valleys, 85
- asymptotic crime, 80
- asymptotic localisation, 80
- asymptotic method, 8, 135, 141, 147

- benign dependency, 152
- Bessel functions, 107, 112, 127, 155, 156, 160–162
 - modified Bessel functions, 114
- Birkhoff–Hermite quadrature, 32, 61, 67, 73, 146
- Borel measure, 163
- boundary element method, 151
- branch points, 150
- butterfly algorithms, 160

- Chebyshev polynomials, 62, 168
- Chebyshev set, 44, 50, 54
- Clenshaw–Curtis quadrature, 62, 73
- collocation, 42
- complex-valued Gaussian quadrature, 77, 108, 109, 115, 120, 139, 144, 147
- critical point, 16

- Digital Library of Mathematical Functions, 154
- Discrete Cosine Transform, 63, 64

- electromagnetics, 151, 160
 - layered media, 160
- error function, 127, 154

- Faà di Bruno formula, 83
- Fast Fourier Transform (FFT), 158–160
- Filon Paradigm, 33, 48, 55, 59
- Filon quadrature, 83, 87, 93, 107, 120, 147, 150, 152, 155, 156, 159, 161
 - adaptive Filon, 74, 147
 - derivative-free, 37, 75
 - error bounds, 68
 - error control, 35
 - extended, 34, 59
 - extended Filon, 133, 137
 - Filon–Clenshaw–Curtis, 60, 62, 64, 67, 68, 77, 136, 142, 157
 - Filon–Jacobi, 60, 64, 67, 68, 77, 136, 141
 - Filon–Olver, 55, 138, 142
 - multivariate integrals, 38, 157
 - original Filon, 30, 161
 - plain Filon, 3, 32, 75, 146
- Filon, L. N. G., ix, 29
- Fourier transform, 112, 158
- Freud-type polynomials, 92

- Gamma function, 169
- Gauss–Hermite quadrature, 87
- Gaussian quadrature, 2, 8, 67, 73, 75, 87, 106, 109, 110, 156, 166, 167
- Christoffel numbers, 167

- Freud-type, 94
- Gauss–Hermite, 92–94, 100, 103, 106, 127, 144, 159
- Gauss–Laguerre, 87, 88, 91, 100, 103, 106, 113, 127, 139, 144, 156
 - tensor product, 102
- Gauss–Legendre, 96, 109, 115, 120
- generalized moments, 49, 168
- Gibbs phenomenon, 158, 159
- Golub–Welsch algorithm, 168, 170
- Gram–Schmidt procedure, 164, 169
- Green function, 107, 151, 160

- Hölder inequality, 68
- Hankel determinant, 115, 121, 122, 129, 165, 169
- Hankel functions, 107, 151–157, 162
- Hankel transform, 112, 114, 160
 - inverse transform, 160
- Helmholtz equation, 151
- Hermite polynomials, 92, 163
- hidden stationary points, 16, 105, 150
- Hilbert transform, 154
- hypergeometric functions, 154, 167, 169

- IEEE precision, 134
- incomplete gamma function, 52
- integrable systems, 122
- integral
 - Fourier-type, 80, 98, 111, 154, 155, 158
 - Laplace-type, 80, 81, 87, 98, 99
