# MULTISCALE MODELING & SIMULATION

**Editor-in-Chief**  
Russel E. Caflisch  
UCLA

## A SIAM Interdisciplinary Journal

Launched in 2003, MMS features research articles that focus on the fundamental modeling and computational principles underlying various multiscale methods. Multiscale modeling is highly interdisciplinary, with developments occurring independently across fields. Research papers and survey articles that augment the fundamental ways we model and predict multiscale phenomena are featured. Particularly emphasized is the interplay between analysis and modeling, modeling and simulation, and mathematics and various applications. Papers bridge the gap in multiscale research between mathematics and various application disciplines, including biology, chemistry, engineering, environmental science, fluid dynamics, geophysics, information science, materials science, and physical science.

**Impact factor: 2.037**

**Rank: 6/74**

## Publication information

ISSN: 1540-3459 (print) / 1540-3467 (electronic)

Frequency

Print: quarterly

Electronic: continuous

Year established: 2003

2009 Print Volume Number: 7

Available formats: Print (6" x 9"), Online

## 2009 Rates

Print with electronic access: \$438 USA, Canada, and Mexico  
\$510 overseas

Electronic-only access: \$416.10 worldwide

Representative papers can be viewed at <http://epubs.siam.org/siam/sampleissue.jsp>

## Developing and Analyzing Numerical Methods

# SIAM Journal on NUMERICAL ANALYSIS

**Editor-in-Chief**  
Thomas A. Manteuffel  
University of Colorado  
at Boulder

Contains research articles on the development and analysis of numerical methods. Topics include the rigorous study of convergence of algorithms, their accuracy, their stability, and their computational complexity. Also included are results in mathematical analysis that contribute to algorithm analysis, and computational results that demonstrate algorithm behavior and applicability.
