Numerical Linear Algebra and Applications, Second Edition

Biswa Nath Datta

This second edition of the author's acclaimed textbook covers the major topics of computational linear algebra, including solution of a system of linear equations, least-squares solutions of linear systems, computation of eigenvalues, eigenvectors, and singular value problems.

2010 · xxiv + 530 pages · Hardcover · 978-0-898716-85-6
List Price \$79.00 · SIAM Member Price \$55.30 · OT116

Numerical Matrix Analysis: Linear Systems and Least Squares

Ilse C. F. Ipsen

This self-contained textbook presents matrix analysis in the context of numerical computation with numerical conditioning of problems and numerical stability of algorithms at the forefront. Using a unique combination of numerical insight and mathematical rigor, it advances readers' understanding of two phenomena: sensitivity of linear systems and least squares problems, and numerical stability of algorithms.

2009 · xiv + 128 pages · Softcover · 978-0-898716-76-4
List Price \$59.00 · SIAM Member Price \$41.30 · OT113

Introduction to Linear Algebra, Fourth Edition

Gilbert Strang

Wellesley-Cambridge Press 9

Gilbert Strang's textbooks have changed the entire approach to learning linear algebra. This new edition is the text that accompanies Strang's video lectures on the OpenCourseWare site, <http://ocw.mit.edu> and includes challenge problems to complement the review problems that have been highly praised in previous editions.

2009 · x + 574 pages · Hardcover · 978-0-980232-71-4
List Price \$87.50 · SIAM Member Price \$61.25 · WC09

Functions of Matrices: Theory and Computation

Nicholas J. Higham

The only book devoted exclusively to matrix functions, this research monograph gives a thorough treatment of the theory of matrix functions and numerical methods for computing them. Its wide-ranging content makes it useful as a general reference in numerical linear algebra.

2008 · xx + 425 pages · Hardcover · 978-0-898716-46-7
List Price \$61.50 · SIAM Member Price \$43.05 · OT104

An Introduction to Iterative Toeplitz Solvers

Raymond Hon-Fu Chan and Xiao-Qing Jin

Fundamentals of Algorithms 5

This practical book introduces current developments in using iterative methods for solving Toeplitz systems based on the

preconditioned conjugate gradient method. The authors focus on the important aspects of iterative Toeplitz solvers and give special attention to the construction of efficient circulant preconditioners. An appendix containing the MATLAB[®] programs used to generate the numerical results is included.

2007 · xii + 111 pages · Softcover · 978-0-898716-36-8
List Price \$69.00 · SIAM Member Price \$48.30 · FA05

The Matrix Eigenvalue Problem: GR and Krylov Subspace Methods

David S. Watkins

This book presents the first in-depth, complete, and unified theoretical discussion of the two most important classes of algorithms for solving matrix eigenvalue problems: QR-like algorithms for dense problems and Krylov subspace methods for sparse problems.

2007 · x + 442 pages · Softcover · 978-0-898716-41-2
List Price \$102.00 · SIAM Member Price \$71.40 · OT101
