| Preface | xi |
| Acknowledgments | xv |
| Optimality | xvii |
| 1 Motivation and Introduction | 1 |
| 1.1 Motivation: Derivatives for ... | 1 |
| 1.1.1 ... Systems of Nonlinear Equations | 2 |
| 1.1.2 ... Nonlinear Programming | 9 |
| 1.1.3 ... Numerical Libraries | 22 |
| 1.2 Manual Differentiation | 23 |
| 1.3 Approximation of Derivatives | 27 |
| 1.4 Exercises | 34 |
| 1.4.1 Finite Differences and Floating-Point Arithmetic | 34 |
| 1.4.2 Derivatives for Systems of Nonlinear Equations | 34 |
| 1.4.3 Derivatives for Nonlinear Programming | 35 |
| 1.4.4 Derivatives for Numerical Libraries | 35 |
| 2 First Derivative Code | 37 |
| 2.1 Tangent-Linear Model | 39 |
| 2.1.1 Tangent-Linear Code by Forward Mode AD | 40 |
| 2.1.2 Tangent-Linear Code by Overloading | 48 |
| 2.1.3 Seeding and Harvesting Tangent-Linear Code | 51 |
| 2.2 Adjoint Model | 53 |
| 2.2.1 Adjoint Code by Reverse Mode AD | 56 |
| 2.2.2 Adjoint Code by Overloading | 71 |
| 2.2.3 Seeding and Harvesting Adjoint Code | 76 |
| 2.3 Call Tree Reversal | 77 |
| 2.3.1 Call Tree Reversal Modes | 80 |
| 2.3.2 Call Tree Reversal Problem | 81 |
| 2.4 Exercises | 86 |
| 2.4.1 Code Differentiation Rules | 86 |
| 2.4.2 Derivatives for Systems of Nonlinear Equations | 87 |
| 2.4.3 Derivatives for Nonlinear Programming | 88 |

| | | | |
|----------|---|--|------------|
| | 2.4.4 | Derivatives for Numerical Libraries | 88 |
| | 2.4.5 | Call Tree Reversal | 88 |
| 3 | Higher Derivative Code | | 91 |
| | 3.1 | Notation and Terminology | 91 |
| | 3.2 | Second-Order Tangent-Linear Code | 98 |
| | 3.2.1 | Source Transformation | 100 |
| | 3.2.2 | Overloading | 102 |
| | 3.3 | Second-Order Adjoint Code | 104 |
| | 3.3.1 | Source Transformation | 110 |
| | 3.3.2 | Overloading | 121 |
| | 3.3.3 | Compression of Sparse Hessians | 129 |
| | 3.4 | Higher Derivative Code | 131 |
| | 3.4.1 | Third-Order Tangent-Linear Code | 134 |
| | 3.4.2 | Third-Order Adjoint Code | 136 |
| | 3.4.3 | Fourth and Higher Derivative Code | 142 |
| | 3.5 | Exercises | 144 |
| | 3.5.1 | Second Derivative Code | 144 |
| | 3.5.2 | Use of Second Derivative Models | 144 |
| | 3.5.3 | Third and Higher Derivative Models | 144 |
| 4 | Derivative Code Compilers—An Introductory Tutorial | | 147 |
| | 4.1 | Overview | 148 |
| | 4.2 | Fundamental Concepts and Terminology | 153 |
| | 4.3 | Lexical Analysis | 156 |
| | 4.3.1 | From RE to NFA | 157 |
| | 4.3.2 | From NFA to DFA with Subset Construction | 157 |
| | 4.3.3 | Minimization of DFA | 158 |
| | 4.3.4 | <code>flex</code> | 160 |
| | 4.4 | Syntax Analysis | 162 |
| | 4.4.1 | Top-Down Parsing | 166 |
| | 4.4.2 | Bottom-Up Parsing | 168 |
| | 4.4.3 | A Simple LR Language | 169 |
| | 4.4.4 | A Simple Operator Precedence Language | 174 |
| | 4.4.5 | Parser for SL^2 Programs with <code>flex</code> and <code>bison</code> | 175 |
| | 4.4.6 | Interaction between <code>flex</code> and <code>bison</code> | 180 |
| | 4.5 | Single-Pass Derivative Code Compilers | 185 |
| | 4.5.1 | Attribute Grammars | 185 |
| | 4.5.2 | Syntax-Directed Assignment-Level SAC | 188 |
| | 4.5.3 | Syntax-Directed Tangent-Linear Code | 194 |
| | 4.5.4 | Syntax-Directed Adjoint Code | 197 |
| | 4.6 | Toward Multipass Derivative Code Compilers | 204 |
| | 4.6.1 | Symbol Table | 205 |
| | 4.6.2 | Parse Tree | 206 |
| | 4.7 | Exercises | 208 |
| | 4.7.1 | Lexical Analysis | 208 |
| | 4.7.2 | Syntax Analysis | 208 |

| | | |
|----------|--|------------|
| 4.7.3 | Single-Pass Derivative Code Compilers | 208 |
| 4.7.4 | Toward Multipass Derivative Code Compilers | 208 |
| 5 | dcc—A Prototype Derivative Code Compiler | 209 |
| 5.1 | Functionality | 209 |
| 5.1.1 | Tangent-Linear Code by <code>dcc</code> | 210 |
| 5.1.2 | Adjoint Code by <code>dcc</code> | 211 |
| 5.1.3 | Second-Order Tangent-Linear Code by <code>dcc</code> | 213 |
| 5.1.4 | Second-Order Adjoint Code by <code>dcc</code> | 215 |
| 5.1.5 | Higher Derivative Code by <code>dcc</code> | 221 |
| 5.2 | Installation of <code>dcc</code> | 221 |
| 5.3 | Use of <code>dcc</code> | 221 |
| 5.4 | Intraprocedural Derivative Code by <code>dcc</code> | 222 |
| 5.4.1 | Tangent-Linear Code | 222 |
| 5.4.2 | Adjoint Code | 224 |
| 5.4.3 | Second-Order Tangent-Linear Code | 226 |
| 5.4.4 | Second-Order Adjoint Code | 227 |
| 5.4.5 | Higher Derivative Code | 229 |
| 5.5 | Run Time of Derivative Code by <code>dcc</code> | 230 |
| 5.6 | Interprocedural Derivative Code by <code>dcc</code> | 231 |
| 5.6.1 | Tangent-Linear Code | 231 |
| 5.6.2 | Adjoint Code | 232 |
| 5.6.3 | Second-Order Tangent-Linear Code | 235 |
| 5.6.4 | Second-Order Adjoint Code | 235 |
| 5.6.5 | Higher Derivative Code | 236 |
| 5.7 | Toward Reality | 236 |
| 5.7.1 | Tangent-Linear Code | 237 |
| 5.7.2 | Adjoint Code | 237 |
| 5.7.3 | Second-Order Tangent-Linear Code | 239 |
| 5.7.4 | Second-Order Adjoint Code | 239 |
| 5.8 | Projects | 241 |
| | Appendix A: Derivative Code by Overloading | 243 |
| A.1 | Tangent-Linear Code | 243 |
| A.2 | Adjoint Code | 245 |
| A.3 | Second-Order Tangent-Linear Code | 249 |
| A.4 | Second-Order Adjoint Code | 251 |
| | Appendix B: Syntax of <code>dcc</code> Input | 257 |
| B.1 | <code>bison</code> Grammar | 257 |
| B.2 | <code>flex</code> Grammar | 259 |
| | Appendix C: (Hints on) Solutions | 261 |
| C.1 | Chapter 1 | 261 |
| C.1.1 | Exercise 1.4.1 | 261 |
| C.1.2 | Exercise 1.4.2 | 262 |
| C.1.3 | Exercise 1.4.3 | 266 |
| C.1.4 | Exercise 1.4.4 | 269 |

| | | |
|-----|----------------------------------|------------|
| C.2 | Chapter 2 | 269 |
| | C.2.1 Exercise 2.4.1 | 269 |
| | C.2.2 Exercise 2.4.2 | 276 |
| | C.2.3 Exercise 2.4.3 | 281 |
| | C.2.4 Exercise 2.4.4 | 283 |
| | C.2.5 Exercise 2.4.5 | 286 |
| C.3 | Chapter 3 | 295 |
| | C.3.1 Exercise 3.5.1 | 295 |
| | C.3.2 Exercise 3.5.2 | 296 |
| | C.3.3 Exercise 3.5.3 | 298 |
| C.4 | Chapter 4 | 308 |
| | C.4.1 Exercise 4.7.1 | 308 |
| | C.4.2 Exercise 4.7.2 | 309 |
| | C.4.3 Exercise 4.7.3 | 312 |
| | C.4.4 Exercise 4.7.4 | 322 |
| | Bibliography | 333 |
| | Index | 339 |
