Contains research articles that treat scientific problems using methods that are of mathematical interest. Subject areas include the physical, engineering, financial, and life sciences. Examples are problems in fluid mechanics, solid mechanics, elasticity, electromagnetic theory and optics, mathematical biology, linear and nonlinear wave propagation, inverse problems, nonlinear dynamics, stochastic processes, signal processing, and image processing. Mathematical techniques include asymptotic methods, bifurcation theory, dynamical systems theory, and probabilistic and statistical methods.

“The SIAM Journal on Applied Mathematics was the first journal published by the Society for Industrial and Applied Mathematics (SIAM)... It includes 80–120 articles in 2,200 pages... Strongly recommended for most academic libraries.”
