SIAM Journal on APPLIED MATHEMATICS

Solving Scientific Problems with Mathematical Methods

Contains research articles that treat scientific problems using methods that are of mathematical interest. Appropriate subject areas include the physical, engineering, financial, and life sciences. Examples are problems in fluid mechanics, solid mechanics, elasticity, electromagnetic theory and optics, materials science, mathematical biology, linear and nonlinear wave propagation, inverse problems, nonlinear dynamics, and stochastic processes. Mathematical techniques include asymptotic methods, bifurcation theory, dynamical systems theory, complex network theory, computational methods, and probabilistic and statistical methods.

Publication information

ISSN: 0036-1399 (print) / 1095-712X (electronic)

Frequency: print: bimonthly / electronic: continuous

Year established: 1953

Available formats: print (6" x 9"), online

2012 volume number: 72

2012 Rates

Print with electronic access: \$676 USA, Canada, Mexico / \$799 overseas

Electronic-only access: \$642.20
