SIAM Journal on

MATHEMATICAL ANALYSIS

Using Mathematical Methods and Innovative Analytical Techniques

Features research articles of the highest quality employing innovative analytical techniques to treat problems in the natural sciences. Every paper has content that is primarily analytical and that employs mathematical methods in such areas as partial differential equations, the calculus of variations, functional analysis, approximation theory, harmonic and wavelet analysis, or dynamical systems. Additionally, every paper relates to a model for natural phenomena in such areas as fluid mechanics, materials science, quantum mechanics, biomathematics, and mathematical physics, or to the computational analysis of such phenomena.

Publication information

ISSN: 0036-1410 (print) / 1095-7154 (electronic)

Frequency: print: bimonthly / electronic: continuous

Year established: 1970

Available formats: print (6" x 9"), online

2012 volume number: 44

2012 Rates

Print with electronic access: \$942 USA, Canada, Mexico / \$1,056 overseas

Electronic-only access: \$894.90
