SIAM REVIEW

The Flagship Journal of the Society for Industrial and Applied Mathematics

SIAM Review consists of five sections, all containing articles of broad interest. **Survey and Review** features papers with a deliberately integrative and up-to-date perspective on a major topic in applied or computational mathematics or scientific computing. **Research Spotlights** publishes research papers of moderate length in applied and computational mathematics which will appeal to SIAM Review's diverse audience. The section publishes both traditional articles and, for example, papers about software, focused survey articles, or timely communications. **SIGEST** highlights a recent paper from one of SIAM's 13 specialized research journals, chosen on the basis of exceptional interest to the entire SIAM community and revised and condensed as

needed for greater accessibility. **Education** consists primarily of individual modules that are self-contained presentations of specific topics in applied mathematics, scientific computation, or their applications; each module provides the primary material needed to teach a given topic as well as supplementary material. The **Book Reviews** section contains a featured review that provides an overview of several books in a subject area. Shorter reviews of individual books are also included.

Publication information

ISSN: 0036-1445 (print) / 1095-7200 (electronic)

Frequency: print: quarterly / electronic: quarterly

Year established: 1959

Available formats: print (6" x 9"), online

2012 volume number: 54

2012 Rates

Print with electronic access: \$412 USA, Canada, Mexico / \$493 overseas

Electronic-only access: \$391.40
