SIAM Student Chapter

Request for Funding 2015-2016 Academic Year Application Form

SIAM provides funding to help chapters generate interest in applied mathematics and computational science among students on campus. SIAM encourages interdisciplinary participation and encourages chapters to reach out to departments outside the mathematical sciences to attract members.

Student Chapters may request up to $500 (US dollars) per academic year from SIAM for chapter activities. Complete request form including a description of proposed activities and budget, broken down by activities funded by SIAM (column 1), activities funded by other sources (column 2), and total funding from all sources (column 3). Sign and submit to SIAM office by 10/2/15 (fax receipt or postmark). Please attach a page describing all your chapter’s activities for the coming year.

To ensure that your request is funded, please follow the funding guidelines included in the accompanying instructions:

Student Chapter:
