Publishes research articles of the highest quality employing
innovative analytical techniques to treat problems in the natural
sciences. Every paper has content that is primarily analytical and
that employs mathematical methods in such areas as partial
differential equations, the calculus of variations, functional
analysis, approximation theory, harmonic and wavelet analysis,
or dynamical systems. Additionally, every paper relates to a
model for natural phenomena in such areas as fluid mechanics,
materials science, quantum mechanics, biology, mathematical
physics, or to the computational analysis of such phenomena

**SIMA is published article by article at epubs.siam.org/sima**

ISSN: 0036-1410 (print) / 1095-7154 (electronic)
Frequency: electronically published continuously
Year established: 1970
Formats: electronic and print
