SIURO

SIAM Undergraduate Research Online

Publishing outstanding research in applied and computational mathematics by undergraduates.

Editor-in-Chief

Joanna Wares
University of Richmond

Associate Editors

Eduardo Cabral Balreira
Trinity University

Brittany Bannish
University of Central Oklahoma

Sasmita Barik
Indian Institute of Technology

Julie Blackwood
Williams College

Tim Chartier
Davidson College

Zichao Wendy Di
Argonne National Laboratory

Maria Emelianenko
George Mason University

Jennifer Fowler
Lamar University

Sommer Gentry
United States Naval Academy

Michele Joyner
East Tennessee State University

Kathleen Kavanagh
Clarkson University

Sara Krehbiel
Santa Clara University

Luis Melara
Shippensburg University

Stephen Pankavich
Colorado School of Mines

Nessy Tania
Pfizer Laboratories

Martin van Gijzen
TU Delft

Abdul-Aziz Yakubu
Howard University

Lizette Zietsman
Virginia Tech

SIAM Undergraduate Research Online is an open-access publication devoted to undergraduate research in applied and computational mathematics. Topics include subjects such as analysis, discrete mathematics, statistics, operations research, optimization, dynamical systems, modeling, and computation. Applications come from areas such as the physical, life, financial, and management sciences and engineering.

Authors may take advantage of the web-based nature of the publication by submitting supplemental files that include animations, software demonstrations, and innovative graphics.

Submit your paper

SIURO papers are written by undergraduates as part of their undergraduate education. Student authors prepare and submit the paper, correspond with an Associate Editor, have the paper read by outside referees, and respond to the referees. SIURO provides articles on applied and computational topics that are accessible to undergraduate students. For faculty advisors and mentors, the publication provides models of outstanding undergraduate research.

Papers are posted online as they are accepted. The turnaround in refereeing papers is very short. Access is free and open to all.
