

SIAM Journal on  
**DISCRETE  
MATHEMATICS**

*Publishing Algorithmic and Computational Discrete  
Mathematics, Combinatorics, and Graph Theory*

**Editor-in-Chief**  
Daniel Kral  
University of Warwick

Contains research articles on a broad range of topics from pure and applied mathematics including combinatorics and graph theory, discrete optimization and operations research, theoretical computer science, and coding and communication theory.

SIDMA has the broadest coverage of any of the leading international journals in discrete mathematics. Topics include but are not limited to:

- properties of and extremal problems for discrete structures;
- combinatorial optimization, including approximation algorithms;
- algebraic and enumerative combinatorics;
- coding and information theory;
- additive, analytic combinatorics and number theory;
- combinatorial matrix theory and spectral graph theory;
- design and analysis of algorithms for discrete structures;
- discrete problems in computational complexity;
- discrete and computational geometry;
- discrete methods in computational biology, and bioinformatics;
- probabilistic methods and randomized algorithms.

**SIDMA is published article by article at <http://epubs.siam.org/sidma>**

**Publication information**

ISSN: 0895-4801 (print) / 1095-7146 (electronic)  
Frequency: electronically published continuously  
Year established: 1988  
Available formats: electronic and print  
2017 volume number: 31

**2017 Rates**

Electronic only \$704 / Print add-on \$99
