

SIAM Journal on Applied Mathematics

Solving Scientific Problems with Mathematical Methods

Editor-in-Chief

Qiang Du
Columbia University

Publishes research articles that treat scientific problems using methods that are of mathematical interest. Subject areas include the physical, engineering, financial, and life sciences. Examples are problems in fluid mechanics, solid mechanics, elasticity, electromagnetic theory and optics, mathematical biology, linear and nonlinear wave propagation, inverse problems, nonlinear dynamics, stochastic processes, signal processing, and image processing. Mathematical techniques include asymptotic methods, bifurcation theory, dynamical systems theory, and probabilistic and statistical methods.
